

# **The Covenant: A New Vision For America**

**Moving from Transaction to Trust. A  
Manifesto by James L. Carr Jr.,  
Candidate for US Senate.**

The Central Question

# Will we be a **Covenant People** or a Contract Nation?

All nations rest on an invisible foundation.

## A Contractual Relationship:

Based on fear, obedience, and sacrifice. It protects the powerful and is rooted in self-interest.

## A Covenant Relationship:

Based on love, faith, and hope. It is built on trust, shared purpose, and mutual responsibility.

📌 **Key Takeaway:** America is currently trapped in a contract. It is time to restore the Covenant.

Meet the Candidate

# A Life Shaped by **Covenant**

James L. Carr Jr.'s life is a testament to the power of the Covenant.

## Adoption

Chosen by family, not by blood. A bond fortified by law but fueled by love.

## The Air Force

Swearing an oath to the Constitution. Diverse people bound by a single mission.

## North Carolina

A state that rose from the ashes of division to become a beacon of education and opportunity.

## The Problem

# The American Contradiction

America was founded on a covenant ("We the People") but compromised by a contract (Slavery and Exclusion).

When we treat citizens like transactions, trust dies. When trust dies, we enter "**The Desert of the Real,**" where systems are designed to extract wealth rather than build a future.

The Obstacles (The Den of Thieves)

# Who Stole the **American Dream?**

A "Den of Thieves" currently controls our economy and government:

01

---

## The Robber Barons

Financial elites who steal our creativity, time, and resources for profit.

03

---

## The Politicians

"Legalists" who write the theft into law and ignore the will of the people.

02

---

## The Ideologues

Media and religious figures who provide "moral justification" for greed.

04

---

## The Jesters

Entertainers who distract us with outrage so we don't notice the theft.

## The Strategy

# Attack by Stratagem

We defeat the Den not by violence, but by strategy—using the tools the Founders gave us.

## The Preamble Test

Every policy must pass a checklist based on the 6 promises of the Constitution's Preamble (e.g., "Does this Establish Justice?" "Does this Promote the General Welfare?").

The Solution (Phase 1 & 2)

# Securing the Foundations

1

## Phase 1: Secure the Vote

End partisan gerrymandering, reform the judiciary (direct election of judges), and modernize the Electoral College.

2

## Phase 2: Secure the Money

Restore the tax policies of the 1990s (the last time America had a surplus) to fund our future without debt.

The Solution (Phase 3)

# Secure the Social Infrastructure

Once we control the vote and the money, we build the floor for every American to stand on:

## Universal Healthcare

Entrepreneurship requires health security.

## World-Class Education

The engine of upward mobility.

## Modern Infrastructure

The arteries of commerce.

## Robust Safety Net

Dignity for our seniors and support for families.

Call to Action

# Join the **Covenant**

"There has never been anything wrong with America that couldn't be fixed by what's right with America".

This is an invitation to stop being a customer in a contract and start being a partner in a Covenant.
